

RPAS/UAS A challenge for international, European and national air law

23/24 May 2013
Cologne, Germany

Institute of Air and Space Law,
University of Cologne

Eric Sivel

EASA, Deputy Rulemaking Director - Head of Product Safety

RESUMÉ

Eric Sivel, a French national, is an engineer from the French Civil Aviation School in Toulouse.

He started working in different airlines where he occupied several technical and commercial positions. He then moved to the Bureau Veritas where he managed oversight activities for the French aviation authority and several African authorities.

He later worked in the JAA where he took part in the creation of EASA that he joined in 2004. There he continued to assist in developing the Agency's activities in its original fields of expertise and in airworthiness, operations, flight crew licensing, aerodromes and air traffic management.
